

PRO Package for Training Centers

OnlineAHA.org helps Training Centers train more people in less time by offering students a **convenient** and **flexible** training option while **maximizing instructor time** with the students. Often, eLearning offers a cost savings due to reduced instructional costs and students learning on their own time.

Online courses enable Training Centers to offer a comprehensive training experience — from high-quality online materials, to hands-on skills practice and testing, to monitoring students' progress.

What is PRO Package?

PRO Package is a custom portal program allowing training providers the ability to bundle their training solution and offer the full portfolio of American Heart Association online courses to their customers.

What it is NOT

- An e-commerce site or storefront
- A learning management system (LMS)
- An instructor replacement

Components

Custom Web Page – myonlineaha.org

Seamlessly incorporates your contact information with AHA branding and behind-the-scenes technology.

PRO Online Key Manager

This tool will help you streamline and improve record keeping, facilitate ongoing customer communication, and enable better overall training management.

Use it to:

- Assign and distribute keys
- Send e-mail reminders
- Reassign lost or unused keys
- Monitor completion status
- Create and print reports

PRO Resource Marketing Tools

You'll get a variety of marketing tools (brochures, flyers, promotional emails) to customize with your Training Center contact information. Just print and distribute to market your courses.

Start-up Course Inventory

Choose your course inventory from the full AHA portfolio. Purchase your start-up key inventory through AHA, and replenish the keys at any time through the distributor of your choice!

Skills Sessions

After students complete their online instruction, they will attend a skills practice and testing session with your AHA Instructor(s). They then will receive the official AHA course completion card.
